Desument No.

February 1946 to May 1948

25X1X

- An airfield, about 10,000 feet square, was east of NIZHNT TAGIL (59°58'E/57°55'N), Sverdlovsk Oblast, Ural MD, about three miles southwest of the railroad car factory, south of a double-tracked railroad line.
- Biplanes were stationed at the field, but landings and take- 25X1X offs of twin-engine contains planes were also observed.

May 1948 to August 1949

- An airfield was located west of the railroad car factory. It was bordered by a railroad line on the north and northwest. This line passed the railroad car factory running east. The blast furnace plants of NIZHMI TAGIL were located in the south.
- The field was allegedly a civil airport." There was little flying with biplanes at this field.

Comment: 25X1A

Report, which is based on two sources, confirmed the field as a civil airport and that primary flight training is conducted there. The small number of biplanes and the small amount of training observed there permit the assumption that a training center of DOSAV is located at the field.

25X1A

Comment:

reports this to be a military airfield.
